If You Are Sick

With Headache, Neuralgia, Rheumatism, Dyspepsia, Biliousness, Blood Purifier, Kidney Disease, Constipation, Female Troubles, Fever and Ague, Sleeplessness, Partial Paralysis, or Nervous Prostration, use **Paine's Celery Compound** and be cured. In each of these cases the cause is mental or physical overwork, anxiety, exposure or malaria, the effect of which is to weaken the nervous system, resulting in one of these diseases. Remove the cause with that great Tonic, and the result will disappear.

PAINE'S CELERY COMPOUND

Is a Laxative, Blood Purifier, and a Tonic. It is a Nervine Tonic. In my case a single bottle wrought a great change. My nervous system entirely disappeared, and with it the remaining affection of the stomach, heart and liver, and the system was wonderfully invigorated. I tell my friends, if sick as I have been, Paine's Celery Compound will cure you!

Will Cure You!

CARE OF THE HAIR.

Some Sound Advice for Women Who Want
Fine Locks.

Hair must be carefully cultivated to grow even in length, supple, silken and graceful in color, says a writer in the Pittsburgh Dispatch. Every thing is encouraging for the improvement of the hair, if time can be given it. The same treatment will not do for different kinds of hair by any means. Strong, stiff, naturally moist hair needs a weekly shampooing and daily and nightly brushing, with exposure to the morning and evening sun, which is a great stimulant to the hair. Thin, soft, dry hair needs tender care, but with either the first step toward improvement is thorough washing of the scalp and hair, which collects dirt its entire length.

To cleanse the hair the various alkalis, borax, ammonia, carbonate of potash and washing soda are used, and the strong hair will bear them, but they burn the life out of thin, dry hair. Most hair washes are used entirely too strong. Soap back is really better than anything I know, except the shampoo powder of "the fatal sisters," which leaves the hair luxuriously silky, instead of flying like thistledown. Pour two quarts of boiling water on a teaspoonful of soap bark, let it cool till pleasant, comb the hair smoothly from the face, part it and scrub down the parting with the shampoo brush like an exaggerated tooth brush, wetting the skin well with the decoction. It lathers well, and the whole head should be gone over, making twenty or more partings, the hair raised in plenty of clear water, combed and wiped smoothly, not rubbing it. Be rationally, and tangle it, which breaks it. The Venetian ladies drew their hair through a crownless hat, and let it stream over the brow to dry, and you may follow the example, sitting in the sun, if possible, an hour. Light is a great stimulant and preservative to hair, and it is well to open it when dry and let the wind blow through. The sun will cause the natural oil of the hair to flow—or the head may be held to the fire until the dry hair feels moist. A small brushing night and morning, careful braiding before sleep, and an hour spent once a month clipping all forked ends, will insure a rapid growth of hair, if the general health is good without other treatment. If you want a stimulant at night rub a little oil of lavender in the roots of the hair with the shampoo brush. Do not irritate the scalp by hard brushing. Regular care is better than overdoing.

Thin, fragile hair is best cleansed with the yolk of a fresh egg, rubbed in the roots with the fingers, left on fifteen minutes and washed off in warm, soft water. The egg is nutritive as well as cleansing to the hair, and may be used twice a week, wiping the hair and drying in the sun. Then comb, and stroke the hair smooth with the palms of the hands, gently and briskly, fifty to one hundred times. This stroking is better than brushing. A gentle current of electricity applied to the scalp every other day is excellent for weak hair, and is nearest to a specific for baldness, partial or entire. To keep hair from falling nothing is better than the old-fashioned tincture of sage and rosemary, which, as no Northern gardener grows rosemary, I leave the druggist to prepare. The wild white sage of the Rocky Mountains has great virtue as a stimulant to the hair. These two pleasant herbs are worth all the rest of the pharmacopoeia for the hair, lungs and nerves.

Regular care is better than overdoing.

THERE are forty-eight national societies of women in this country, with a direct membership of 500,000 members. The largest is the Women's Christian Temperance Union, with a membership of 210,000. Then follow the Missionary, the Peace, the Suffrage organizations and philanthropic and educational societies. Twelve of these national organizations have joined with the National Council, which was formed to unite all the women societies of the nation into one great and powerful league.

STRANGE as it may seem, there are a few scattering Democrats up in Dakota. A sharp frost would likely thin them out. A Dakota Democrat is a great deal like a green nubbie.

THE English holly, over which New Yorkers are so enthusiastic, is mainly imported from New Jersey. They call it imported and "English, you know," to make it sell.

NEW Yorkers having raised \$150,000 for the Grant monument, generously propose that Congress or the distant people be permitted to contribute the lacking \$370,000.

THE Red Cloud (Minn.) National Bank collapsed the day before Christmas. The lack of a silver lining evidently led to this cloud-burst.

The Republicans of the Maine Legislature last evening renominated United States Senator Frye by acclamation.

Could Not Separate Them.

WASHINGTON, Jan. 2.—While the Senate was discussing various items of the Senate tariff bill to-day, Stewart of Nevada obtained the floor and said he found the tariff question so intimately connected with the question of money that he was unable to separate the two. He thereupon proceeded to read a speech on silver coinage.

California School Lands.

WASHINGTON, Jan. 3.—In the case of The United States vs. The State of California, involving the question of the right of the State to indemnity for school lands, or to compensate the deficiencies in the fractional townships made so by reason of swamp land found therein, the Secretary has reversed the decision of the Commissioner of the General Land Office and sustained the validity of said selections. The selections in this case were approved and certified to the State prior to the Act of March 1, 1877, as land inuring to the State, under the Act of February 26, 1859, providing for school land indemnity to compensate for deficiencies where the school sections were wanting, or where the townships were fractional, for any cause whatever. The Commissioner held said selections invalid, for the reason that they were based upon alleged deficiencies in the fractional townships, caused by swamp lands found therein, and held that said section for cancellation directed that they be disposed of under the provisions of the second section of the Act of March 1, 1877, which allows the purchaser from the State to purchase said lands of the Government where said selections were invalid and not confirmed by the Act of 1877.

Emancipation Anniversary.

WASHINGTON, Jan. 3.—At the celebration of the twenty-sixth anniversary of the emancipation proclamation in Alexandria last night, by the Frederick Douglass Library Association, letters were read from Harrison and Morton, both conveying congratulations encouraging the negro element to constant upward effort. There is in the Indianapolis letter, however, a passage which seems to throw cold water on the hopes of the nation on the selection of the colored man for a cabinet position. He says: "You have showed great patience under severe trials, and there may be yet further call for the exercise of this homely virtue, and it is quite possible that the high expectations of our friends may not at once be realized, but we can at least keep things moving in the right direction."

The "Flyer" Ditched.

OMAHA, Jan. 3.—It was reported here this morning that the "Golden Gate Special" on the Union Pacific, which went west last night, was wrecked near Echo Canyon, Utah. The report proves, on investigation, to be untrue. The story probably grew out of the fact that the "Overland Flyer" met with an accident near Echo Canyon on Tuesday night, when two sleepers and two day coaches jumped the track. Nobody was killed but Professor Stark of Cheyenne had a leg broken.

Reaching Out.

ST. PAUL, Jan. 3.—A Globe special from Sioux City says: "It is practically settled that the Union Pacific will in the immediate future operate a line of road from the West to Sioux City, crossing the river on a new bridge. An arrangement has been made between the Union Pacific and the Chicago, St. Paul, Minneapolis & Omaha, the former securing track privileges between Sioux City and Norfolk, Neb., over the track of the latter company."

New Year's Reception.

BERLIN, Jan. 3.—The National Gazette says: At the New Year's reception held by Emperor William, Count Von Moltke advanced to the Emperor and expressed the good wishes of the army. In reply, the Emperor said: "The occasion upon which you are first assembled around me will be specially remembered. I have in the labors before you will serve me with the same fidelity that you displayed toward my father."

Latest From Emin.

SUAKIM, Jan. 3.—A sergeant who belonged to the Egyptian army has arrived from Khartoum. He states that he left the latter place on November 23. At that time Emin Pasha had not been captured by the Mahdi's forces, but was repeatedly defeated. The officers at Suakim who are personally acquainted with the sergeant know that he is trustworthy and believe his information true.

Ready to Fight Sullivan.

NEW YORK, Jan. 3.—The following was received by Richard K. Fox this morning: St. Louis — Kilrain will sign articles to fight John L. Sullivan for \$20,000 and the championship of the world, at either Toronto, Ottawa or Montreal. Both Mitchell and Kilrain emphatically deny that they have any misunderstanding with Fox.

Congressional Proceedings.

WASHINGTON, Jan. 3.—House.—On motion of Toole of Montana, the Senate amendment was concurred in to the House bill appropriating \$33,000 to enable the Secretary of War to issue to the Governor of Montana military stores for the use of the militia of that Territory.

On motion of McKenna of California the Senate bill was passed, appropriating \$3,800 for the relief of Wm. R. Wheaton, ex-register, and Charles H. Chamberlain, ex-receiver of the land office at San Francisco.

The call showed the presence of 171 members, eight more than a quorum, but the margin was too narrow, and the proceedings under the call were not suspended. The Sergeant-at-Arms was dispatched to arrest the absentees, and the House drowsily waited for him to make his report, and as this was not forthcoming at 3 o'clock, the House adjourned.

Reed of Maine reported a resolution providing that during the remainder of the present session there shall be no call of States and Territories on the first and third Mondays of each month. These Mondays are what are known as suspension days, and the object of the rule is to prevent the opponents of the Union Pacific funding measure, and the Oklahoma bill from filibustering, against an attempt to pass these measures under a suspension of the rules, by introducing voluminous bills under the call of States, and consuming the day by a demand for their reading in full.

Reed demanded the previous question on the adoption of his resolution, which called for a vigorous protest from Anderson of Kansas, who has been one of the chief antagonists of the Union Pacific bill.

He asked that two hours' debate be allowed upon the resolution, but Reed declined to accede to his request, on the ground that he had been instructed by the committee for a demand for the previous question.

Randall of Pennsylvania, a member of the Committee on Rules, stated that there had been a division in the committee upon the resolution.

Anderson demanded the yeas and nays on ordering the previous question, when no quorum voted the roll closing 114 yeas in the affirmative and 28 in the negative, Randall being the only member of the Committee on Rules voting with the minority. A call of the House was ordered.

A resolution heretofore offered by Voorhees, calling on the Secretary of the Interior for a list of all the homestead, timber culture and pre-emption certificates to public lands, cancelled after issuance, if the issuance of the final receipts and certificates therefor, during the present Administration, for causes other than voluntary relinquishment. Agreed to. Mitchell offered a resolution (agreed to), calling on the Secretary of War and the Interior for copies of the records and papers relative to the service of volunteers in Washington and Idaho Territories in the Nez Percés war of 1877. The Senate resumed the consideration of the tariff bill, the pending question being Vest's amendment to paragraph 313, to change the duty on cotton, thread, yarn, warp, etc., valued at not exceeding twenty-five cents per pound, from ten cents per pound to thirty-five cents ad valorem. A speech of some length from Vance on Vest's amendment followed, after which it was rejected by the usual party vote.

A change was made in the sugar schedule by the Senate sub-committee in charge of the tariff bill, which provides a bounty of one cent per pound upon all sugar raised in this country. This has been, it is said, fully agreed upon.

Senator Stewart introduced a bill authorizing the Secretary of the Treasury to refund all income taxes, which, upon the principles subsequently settled by a decision of the Supreme Court, are shown to have been illegally and unconstitutionally collected. The money to be paid out by the Commissioner of Internal Revenue.

Relief for the whalers.

WASHINGTON, Jan. 3.—A petition was presented to-day by Senator Stanford, from the Chamber of Commerce of San Francisco, calling the attention of Congress to the urgent need of a permanent relief station in the Arctic ocean. The petition says the whaling fleet fitting out at San Francisco is steadily increasing, and many hundreds of lives and millions of dollars worth of property are exposed to unusual danger in the pursuit of whaling in the Arctic. The relief station to be supplied with provisions, fuel, medical stores, heavy clothing and life-saving apparatus. The petition says it would be a great boon to Arctic whalers.

Successfully Executed.

MAY'S LANDING, N. J., Jan. 3.—Robert Elder, Jr., was hanged at noon for the murder of his father. Death was almost instantaneous, the convulsions ceasing within seven minutes from the time the drop fell. The killing resulted from the ill-treatment of Robert's mother and brother by his father. The murdered man was 60 years old. The killing was witnessed by his grandfather, aged 90.

A Baylan Emmissionary.

NEW YORK, Jan. 3.—Cablegrams from Paris announce that Dr. Nemours Auguste, an emissary of Hypolyte, had an audience with President Carnot, and that the latter had under consideration the proposition to accord equal recognition to Hypolyte and Legitime. Greville Reuch, the only black man in the French Chamber of Deputies, will, it is said, bring the subject before that body.

Favors Prohibition.

BOSTON, Jan. 3.—Governor Ames sent his annual message to the Legislature to-day. He advises the early submission to the people of a prohibition amendment, and advocates an increase of the penalties for violating the liquor laws, and thinks it wise to substitute imprisonment for fine in such cases.

Distinguished Visitors.

INDIANAPOLIS, Jan. 3.—Senator Hiscok of New York arrived this morning and proceeded to General Harrison's house. R. W. Thompson, ex-Secretary of the Navy, will call upon Harrison this afternoon.

Inauguration of Governors.

AUGUSTA, Jan. 3.—Governor Barlegh was inaugurated at noon.

BOSTON, Jan. 3.—Governor Ames was inaugurated at noon.

LANSING, Jan. 3.—Governor Luce was inaugurated at 2 o'clock this afternoon. A considerable portion of his inaugural address was devoted to the temperance question, recommending the passage of a local option law.

A Fruitless Conference.

CHICAGO, Jan. 3.—The conference of the Engineers' Committee with the Burlington railroad officials this morning adjourned without result till this afternoon.

Cavaner says the ultimatum of the Brotherhood has been laid before President Parkins of the Burlington road, who is in Boston. His decision was expected by telegraph this morning, but, as it did not come, the conference took a recess.

Presidential Nominations.

WASHINGTON, Jan. 3.—The President sent the following nominations to the Senate: Solomon Claypool of Indiana, to be United States Attorney for Indiana; T. Carlos Jewett of Minnesota, to be Commissioner for the District of Alaska, to reside in Sitka.

Lydia Thompson.

Lydia Thompson and her company of fifty female artists will appear to-night in "Penelope." Don't miss it, for it is first-class. Bald-headed men can't keep away, but it is the younger members of society that the GAZETTE desires to impress. A Table of Nutrients.
 The American Analyst says: A pint of white beans, weighing one pound and costing seven cents, contains as much nutriment as three pounds and a half of roast beef, costing 87½ cents. Of all the articles that can be eaten the cheapest are bread, butter, molasses, beans and rice. A pound of corn meal goes as far as a pound of flour. If corn and wheat were ground, and the whole product, bran and all, were made into bread, fifteen per cent. of nutriment would be saved, with much greater healthfulness.

HIGHLY PLEASED.

Resolution of Thanks to Mr. Gest, Mr. Fulton, Mr. Warner and Others.

The Nevada, California & Oregon Railway eclipse observing party returned from Liegan, their field station, last evening at 7 o'clock. The members are all highly pleased at the labor done, and feel that the expedition is a success. They met in the parlors of the Depot Hotel, and, with the Director in the chair, passed unanimously the following resolution of thanks to Erasmus Gest (General Manager), J. M. Fulton (Superintendent), L. F. Warner (Chief Engineer), and other officers and employees of the company, who have so generously aided in many ways the success attained by the expedition:

Resolved, By the following members of the eclipse observation party that the thanks of the members be extended to E. Gest, Esq., General Manager, John M. Fulton, Superintendent, L. F. Warner, Chief Engineer, and all other officers and employees of the Nevada, California & Oregon Railway Company, who have so kindly aided us in our labors, by means of free transportation, quarters, furnished, and personal aid extended throughout the expedition. We feel that without this kindly assistance and the earnest labor of R. L. Fulton, L. F. Warner and others we could not have succeeded.

Resolved, That a copy of this resolution be published in the Reno Gazette and Reno Journal, and a copy be presented by the director, Gen. C. W. Irish, to the officers of the company. C. W. Irish, C. W. Friend, T. Coffin and L. F. Warner, astronomical party; D. P. Butler, J. W. Moffatt, S. Pinniger, W. M. Miller and G. S. Hawkins, photographic party; C. D. Vanduzer, meteorological observer.

At this writing (noon the 3d) I have to say that D. P. Butler, the director of the photographic party, has developed six of the eleven photographic plates exposed, and finds them all good and some of them fine pictures of the corona and the beautiful phosphores of the sun, with the red hydrogen clouds well outlined.

We have not yet had the time in which to reduce and compare the results of observations made by Professor Friend and myself, but shall do so at once, and a full report will be made out for publication in the astronomical journals. The *Sideral Messenger*, published at Northfield, Minn., by Prof. W. W. Payne, will be the one selected, and it may be in some other Journal also.

To-morrow a full report of the work of the party will appear in the Reno Gazette, giving descriptions of all that was done, the instruments used, the names of the parties using them, and a picture of the corona, as observed and photographed. We obtained three good drawings of the corona, the work of Tremore Coffin, Esq., Mrs. General Irish and myself.

While each of us have a somewhat different idea of details, our independent work shows close accordance and is certainly near the truth.

C. W. IRISH, Director Eclipse Observation Party of Nevada.

A SATISFACTORY VISIT.

Johnson Sides Returns From a Diplomatic Trip.

Johnson Sides, who recently returned from a trip to the Fort Hall (Idaho) reservation where there are 1,000 Bannock, Snake and Shoshone Indians, informs a GAZETTE reporter that just before he left there a Nez Perce Indian arrived at the reservation with about 20 Louni Indians to join the Fort Hall people in a grand dance, this being the first time that the Fort Hall Indians ever had a visit from this band. There is a disposition among all the aborigines this side of the Rocky Mountains to become more neighborly than heretofore, and hereafter they will visit each other more often.

Old Tyhee, of Fort Hall, who paid a visit to Washington last Summer, says that he is now satisfied that the Government intends to protect the Indians, and that they need have anything to fear as long as they behave properly.

From what Sides says there is no danger of any more outbreaks among the natives of the Great American Basin. About fifteen Bannocks returned with Sides to visit the Pintos of the Pyramid reservation and Reno.

A Grand Success.

The thirteen views of the eclipse taken by Mr. Butler of Reno are said by General Irish to be perfect. One view shows clearly and distinctly, the second contact, and on the whole, the photographic work could not have been better done.

Jumped a Switch.

Last evening, as some switching was being done in the Reno yard, one car refused to be switched, and it landed directly across the track. A few jack-screws, some muscle and a quantity of adjectives soon put the train where it belonged.

Another Richmond.

W. O. H. Martin carries a large assortment of hardware, in fact the largest in the city, and can fill any order sent him, from a screw to the heaviest bar iron.

Richard Herz, the jeweler, received from Germany a child's book of poetry entitled "Wenn der Frühling Blüht" or, translated "When the Spring is Coming," that is truly a work of art.

Those who attend the theater to-night and feel hungry after it is out can get oysters in any style, cooked in the best manner, with all the side dishes thrown in, at the Grand Restaurant.

Senator Reagan of Texas is getting all there is in his hip pocket. Under the law which allows each Senator a private Secretary, he has appointed his wife to that position, thereby keeping the salary in the family.

"The World Against Her" will be produced at McKissick's Opera House January 8th. The New York Times says: "The World Against Her," at the People's Theater, has scored a great success. Since the night of its production the theater has been crowded." Box sheet now open.

PERSONAL.

Theodore Winters was in Reno yesterday.

S. M. West and wife of Loyalton are in town.

Miss Taddie Doane of Carson was in Reno last evening.

A. C. Nichols of Sierra Valley is in town for a day or two.

Archie Farrington returned from California this morning.

F. M. Rowland returned to his Long Valley home this morning.

L. Adams of Fish Springs and Tule Frank of Winnemucca Valley are in town.

Senator Foley drove up to Carson to-day to be on hand when the caucuses are held.

Mrs. Dr. Dawson and sister, Mrs. A. W. Aldrich, went below on last night's overland.

John F. Eagan of the Comstock and Sam Longbaugh of Empire were in town last evening.

B. F. Leete has returned from the southern part of the State, where he has been for several months.

R. L. Thomas (our Dick) arrived from California this morning. It is just possible that he is looking for a Legislative position.

"Back Whiting, one of the few survivors who discovered the present site of the town of Quincy, Plumas county, Cal., was in Reno last evening.

Mrs. Frank Campbell and sister, Mrs. Sol Simpson and daughters, who for several weeks have been visiting Carson relatives and friends, went to California last evening.

CHIP O' THE OLD BLOCK.

This Excellent Company to Appear at McKissick's Opera House.

Of this comedy, to be produced at the Opera House Saturday evening, the New York Sun of April 17th says: "A union of boisterous mirth and old-fashioned melodrama was accomplished with entire success last night at Third Avenue Theater. The result was made possible by the well-directed efforts of a dozen actors and actresses, who had been selected with a view to individual ability, and yet had been grouped so that the entertainment became harmonious, if now and then exaggerated. The vehicle for this unusual achievement was 'A Chip of the Old Block,' from the pen of Herbert H. Winslow, a young author, and one of promise. He has retained the accepted forms of melodrama while departing from the conventionality of burlesque, and between the two the night passed quickly and enjoyably.

Lydia Thompson To-Night.

Mr. Jay Rial, manager of the Lydia Thompson company, paid a visit to the GAZETTE this afternoon. He wishes the Reno public to know that the performance will begin promptly at ten minutes before eight, in order to give a full and complete performance of "Penelope." The company leave at 11 o'clock for San Francisco, the train being held just thirty minutes. Mr. Rial assures us that his performance to-night will be exactly the same in every particular as that given by the company in all the large cities.

Portland, Oregon, March 22.

Having tried the effects of the concentrated extract of Oregon Kidney Tea, we cheerfully bear witness to its beneficial agency in affections of the digestive organs. It is simple, pure and sure. It is easy taken and restores healthy vitality to the organs it is intended to operate upon with assured success.

A VERY DANGEROUS CRISIS.

The People Asked to Charter a Criminal Institution.

Reno, Nev., January 3.

EDITOR GAZETTE—DEAR SIR: One of the first, if not the very first, bill that will be brought to the surface after the meeting of the Legislature, will be one to sanction a lottery scheme. No measure for the good of the State, no demand made by the people will begin to receive the support from the outside that this will. It will be more vigorously pushed than anything that comes before the Legislature, and if the people think it is some little scheme of a few Carson citizens they will wake up too late and find themselves the victims of the worst conspiracy that ever was gotten up in Nevada, if it was gotten up here.

There is big money behind the scheme, and it draws its strength from many places outside the capital and outside the State. It has supporters among the men who have put up some of the most successful and most heartless deals ever worked on the coast.

If this proposition ever carries it means good-bye to the last vestige of political liberty in Nevada. It will dominate this State as no bonanza kings, or railroads, or cattle associations ever did before, and, with our small population and large floating element, it will never be in the power of the people to throw it off in the world; and, while it will control the State, it will have no motive except to wreck it. The bonanza politicians are in the legitimate business of mining, the railroads own lands and large properties and prosperity for us means money for them, and cattle kings are our citizens and help to build up the State, but the managers of a lottery have no desire except to drain the State. Their whole success depends on getting the hard earnings of the poor, and giving them the smallest possible return.

It is not that we would make Nevada to America what Monte Carlo is to Europe, an ulcer on the map where all the corruption of the States could come to the surface. Instead of bringing in an industrious class of prospectors and small farmers to build up the community by honest industry, they would encourage a swarm of fast people, sharpers, would-be sharpers and victims, bad women and worse men, who would have no more regard for the State or its citizens than the vulture has for the sheep camp where it steals its lamb.

The indictment held out to the unsuspecting citizen or legislator in the men and women are bound to gamble and the money should be kept at home, and that the lottery company will pay a revenue to the State. The argument need only be stated to answer itself. Nevada people gamble, it is true, but the office of government is to discourage and to punish crime, not to encourage it. There is nothing that can be said in favor of a lottery that cannot be urged in favor of the lowest form of gambling. Weak men who love to gamble and commit other follies have a right to claim that temptation be not put upon them by the State that is supported by them and others to suppress crime and promote prosperity.

But more than all the rising generation have claims of this sort. They should not be forced to face this evil genius of gaming with the sanction of their fathers and mothers backing it up. Children should not be taught that it is a good way to earn a living or to spend their wages. They will have temptations enough and difficulties enough to overcome in order to succeed in life without being born gamblers.

We have already seen one such scheme voted by Governor Stevenson and we believe he will stand firm, but he is supposed to be guided by the will of the people, and if their representatives continue to send him such measures for signature, how far is he justified in resisting, if no notice is taken of the matter by the people themselves.

The people of Nevada must act for themselves in this matter and we hope to see those who love their State, who have children growing up, who hope to see our State grow and rise to her proper place in the sisterhood of States, not sit idly by and see this evil put upon them. The people have the matter in their own hands now, but if once they loose their grasp, this ready calamity will have the State by the throat and will never unloose its fangs while there is a drop of blood to suck. Respectfully, INDEX.

VALUABLE SLATE DISCOVERY.

Which is Thought to be Sixty Feet Wide.

A Placerville, Cal., dispatch of January 1st says: The El Dorado Big Tunnel and Mining Company, which is driving a tunnel 3,400 feet in length on its mining ground about a mile and a half north of Placerville, El Dorado county, has struck, at a distance of 470 feet from the mouth of the tunnel, an immense body of slate, which bids fair to exceed in value the gold-bearing quartz lodes, for the development of which the tunnel is being driven. The tunnel now penetrates this slate body thirty-five feet at a distance of 300 feet beneath the surface of the ground. From the general formation of the surface rock it is calculated the lode will continue sixty feet in width. Expert slatemen, who have derived life-long experience in the slate quarries of Wales and Pennsylvania, have examined the slate and enthusiastically pronounce it superior to any they have ever seen, entirely free from foreign or metallic substances, and of a texture that permits it to split to the thinness of paper with but a trifling waste.

Suit for Taxes.

Lander county has brought suit against the Southern Pacific Company for taxes. The company tendered the amount of the tax levied against its property, less the tax on certain lands which the company claims belong to the United States. The Lander authorities refused to accept anything less than the whole amount, hence the suit. Sheriff Van Patten has attached the coal bins, cable coral, sidetrack and buildings (belonging to the company) at Battle Mountain. A few years ago Lander county brought suit against the company for taxes, and attached the trains.

RAILROAD SURVEYS.

A Large Amount of Work Which Must Mean Something.

The Adin Argus of the 27th ult. says: Big Valley is not going to get left as far as railroads are concerned. Some two weeks ago a party of about fifty surveyors, supposed to belong to the Union Pacific Railroad Company, left Redding with the intention of surveying for a distance of about 500 miles in a northeasterly direction, which would probably take them to Boise City, Idaho. After leaving Redding the party divided up into several companies and commenced their survey. These several parties are now scattered all the way between Redding and Alturas, and are doing their work thoroughly. One of the parties, consisting of ten or twelve men and three four-horse wagons, passed through Adin last Sunday on their way north. Of course they were mum, but from appearances they were well equipped for their work. Something must come of this great railroad talk and numerous surveys.

San Francisco Meat Market.

Beef is steady at former rates. Veal and mutton are in moderate supply and steady in price. Supplies generally are about enough to meet all market needs, so that dealers do not complain of surplus. Following are the rates for whole carcasses from slaughterers to dealers:

Beef—First quality, 7¢; second quality, 6¢; third quality, 5¢; fourth quality, 4¢.

Veal—Quotable at 6¢ for large and 7¢ for small.

Mutton—Quotable at 6¢ per pound.

Lamb—Quotable at 7¢ per pound.

Pork—Live hogs, on foot, grain fed, 6¢; dressed hogs, 5¢; dressed hogs, 4¢.

Are we to have another war?

Some political prophets aver that we shall. Be that as it may, the battle waged by medical science against disease will never cease until we arrive at that utopian epoch when the human family shall cease to be afflicted with bodily ailments. One of the most potent weapons which the armory of medicine furnishes, is Hostetter's Stomach Bitters, which is of special utility in a family remedy, as it is adapted to the immediate relief and ultimate cure of those disorders of the stomach, liver and bowels which are of common occurrence. Indigestion, biliousness and constipation are inseparable companions, and these ailments are completely eradicated by the Bitters. But the remedial scope of this superlatively wholesome and genial medicine lies also in nervous ailments, rheumatism and kidney troubles; its action in these, as in the other complaints, being characterized by unequalled thoroughness.

A Card of Thanks.

A card of thanks from Miss Lida Oakes, teacher of instrumental and vocal music, piano and organ. I take this method of thanking my patrons for their kindness during my short stay in Reno, and hope for the continuance of the same during the coming year. My terms are \$4 per month, two lessons a week, or \$3 per month, one lesson a week; \$2 per month for the use of instrument. Rooms at the residence of Rev. C. L. Fisher, corner of West and Second streets.

Go and Get Relief.

Dr. Liebig & Co. of San Francisco will be at the Palace Hotel, Reno, to-morrow, January 4th, where the afflicted can get relief. The wonderful cure of special, private, chronic and complicated diseases by the medical staff of the Liebig Medical Dispensary and International Surgical Institute in the past quarter of a century on the Pacific coast has astonished every one. If you are afflicted in any way go and get relief.

Merit Wins.

We desire to say to our citizens that for years we have been selling Dr. King's New Discovery for Consumption, Dr. King's New Life Pills, Bucklen's Arnica Salve and Electric Bitters, and have never handled remedies that sell as well, or that have given such universal satisfaction. We do not hesitate to guarantee them every time, and we stand ready to refund the purchase price, if satisfactory results do not follow their use. These remedies have won their great popularity purely on their merits. S. J. Hodgkinson, druggist.

A Cooking Lesson.

Yes, Daisy dear, we can tell you how to make an oyster pie. Take a yard and a half of oysters, cut them bias, and stuff them a la tournaise. Put in a lump of butter, crimped and hem-stitched. The paste must be rolled thin and box-plated. Trim with a floral border of crochet work. Set the dish in a hot oven and go home to your mother.

Installation of Officers.

The members of Gen. O. M. Mitchell Post, G. A. R., are cordially invited to meet the Relief Corps at their hall Saturday evening, January 5th, at 7:30 o'clock, without further notice, at which time the officers elect of the W. R. C. will be installed by the Dept. President, Lizzie D. Waterman of Stockton.

It is generally conceded by physicians that about one-half of the population of the United States are suffering from indigestion and dyspepsia. Heartburn, flatulency, constipation and insatiable thirst are the principal causes. Dr. Healy's Bile Beans "Tonic" strengthens and invigorates the digestive organs, and enables one to enjoy a hearty meal without any unpleasant after-effects. Sold by Wm. Pinniger.

SHE LACKS DISCRETION.

How a Washington Woman Injured Herself and Her Friends.

A lady who is now dwelling in Washington, as she has been for the last three or four years, in one of the finest houses of the city, who has no end of money, and all that sort of thing, is in serious trouble, says a Washington correspondent, and feels that the social season for her has been a failure. She was not blessed with the gift of discretion, and the evening she has said and done have been the town talk ever since she made her appearance in Washington. The trouble this time came from an attempt to separate the sheep from the goats, as it were, in a social way. This lady, who always has entertained elegantly, and desired to do so more than ever this winter, issued invitations for three teas, which were intended to introduce her lovely young daughter to society. To the first tea all the creme de la creme were asked and went. To the second tea another company, a degree lower in cast, as caste is understood in Washington, were invited, and to the third all the rest were told to come like poor relations.

It does not seem to have occurred to the hostess that her friends might not like to be classified in this way, but the discrimination would not have been so conspicuous if the lady herself had not given it away. To a particular friend who was not in town when the first tea was given, she sent an invitation to the second, and explained that she was sorry because he "could not meet our best set." The little remark was innocently repeated as characteristic of a lady who often said foolish things, and then was maliciously circulated, as such remarks often are. It was over the whole town in a week. Those who attended the second tea didn't like it any too well, but the third lot were howling mad, and not more than a dozen came, although a hundred or more were expected and provided for. People then began to ask their acquaintances if they belonged to Mrs. So-and-So's first, second or third set. Those who were asked to the first set enjoyed it, but the others didn't see the joke.

Finally the lady learned the cause of the small attendance at her third entertainment, and for very bad about it for she is too good-humored to intentionally offend any one. Then she set about to contrive some way of retrieving the error, but instead of getting out fell still deeper into the mire. A charity ball was given with tickets at two dollars a head. She purchased two hundred of these tickets and sent them, with her compliments, to all who had received invitations to the third tea. It was kindly intended, but had an effect opposite to that desired, for those who received the compliments felt more like poor relations than ever. Some threw the tickets into the fire; others returned them to the lady with indignant or sarcastic notes, saying that while they were not so rich as she they were still able to pay their way to any entertainment they wanted to attend, and were not accepting charity. And at the ball it was a common joke for the guests to ask one another if they came in on Mrs. So-and-So's charity tickets.

UNIQUE RAILROADING.

A Conductor Stops His Train to Chase a Real Bad Boy.

A young lady who had just returned from a far Southern tour was narrating her experiences away down in Dixie to a Nashville American reporter. The funniest thing that happened upon the whole trip," she said, "was while traveling through Alabama. We had just passed a little town in the heart of the cotton district when my attention was called to one end of the coach, where I noticed several passengers standing around a boy about twelve years old. He was yelling vociferously, with his hands, as the train was passing, picked up a rock and threw it at him. The stone struck the window-pane, shattering it, and a piece of glass cut a long and painful gash under the young tourist's eye. In a few minutes every passenger in the coach was offering some suggestion and interfering with those who were trying to blind up the wound. The conductor came upon the scene about this time. Upon learning the situation he immediately stopped the train and began backing it to the place where the deed was done. As the train had been going at a rapid rate it was several miles from the scene of the action. The lad who threw the stone was standing near the track with his hands in his pockets, doubtless wondering why the train was coming back, but when the train stopped within a few feet of him he must have guessed the reason, for he immediately grasped his hat in his hand and started like a race-horse across the muddy fields. In a few minutes all the male passengers of the train were in hot pursuit, and all the females were at the windows watching the chase. Cries of "fence and across fields the little boy and his pursuers ran. Finally a hill hid the race from our view. For nearly half an hour we waited in suspense the result of the chase. The first man to make his appearance was a drummer who explained that after chasing the young miscreant about a mile, they came to a broad, shallow creek, which the boy plunged through without hesitation, but the passengers, not desirous of getting wet, decided to discontinue the pursuit. It was the most ridiculous thing I ever witnessed. Just as the boy was about to get to the other side of the creek, a large crowd of grown men running after a twelve-year-old boy just as hard as they could tear. Great half hour was spent in waiting for the scattered passengers to get back to the train, and finally we resumed our journey on South."

Girls, Here's Your Chance.

Mr. William Knox, of Santa Monica, Cal., who has become rich through the boom out there, wants a wife, and sensibly goes to the newspapers to help him. In a letter to the San Francisco Examiner he says that it might be "wouldn't feel so lonesome" if he had some good woman to "kind of coddle him up" a little. "The boom has made me rich," he writes, "but as far as women is concerned, it ain't the same as it is with dirt. There ain't no boom in winning. In fact, it beats the dickens how scarce they are in this glorious land. Any poor girl who may wish for a home in Southern California can have one by addressing to William Knox, who is in want of a wife between the ages of twenty-five and thirty-five years. The first who will have her heart. She will have a good, hard-working man. She will have a good, honest, sober man, and a man that is never seen to go inside a saloon. What more do a woman want?"

A True Soldier.

"Yes, gentlemen," said the Colonel, as he returned his glass to the counter, "the true soldier is never averse to discipline. No matter how objectionable orders from a superior officer may be, they must obey promptly and without question. The true soldier never—" "Pa," said the Colonel's little boy, opening the door, "ma says to come home right away." "Gentlemen," said the Colonel, "good day."

THE CENTURY

MAGAZINE IN 1889.

WHY

Has it such an enormous circulation? Experts estimate that between two and three millions of people read each number.

BECAUSE THE CENTURY is above every thing a leader. It led the development of wood-engraving in America, and has fostered original authors. It is alive to the issues of to-day. What it prints sets people to thinking and talking.

BECAUSE whatever other periodicals the great reading world has found out that no household can keep abreast of the times without THE CENTURY. Its success is explained by its contents.

BECAUSE The greatest writers of the world like to have their work read by the greatest number, and therefore to such a magazine as THE CENTURY the best naturally comes. It was for THE CENTURY that General Grant first wrote his reminiscences of important battles.

BECAUSE It is publishing the life of Abraham Lincoln, by his private secretary. Of this it has been said: "The young man who is not reading it robs himself of that which he will hunger for."

BECAUSE It is printing the most remarkable articles on "Siberia and the Kailash System," by George Kennan, which are attracting universal attention and are being reprinted in hundreds of foreign newspapers, but are not allowed to enter Russia.
